Research unit mission

Research unit objectives

Vision, mission and objectives of the research unit

Vision of the unit

To establish the Research Unit at the Faculty of Nursing as a leading and distinguished center for nursing scientific research at the local and regional levels, contributing to the advancement of knowledge and the improvement of healthcare quality through innovative and sustainable scientific research.

Mission of the unit

Supporting and developing scientific research in various fields of nursing and healthcare by providing a stimulating research environment, building researchers' capacities, and encouraging applied studies that address community needs and enhance the quality of nursing education and practice. This is achieved in alignment with academic and ethical standards and contributes to achieving sustainable development.

Objectives of the unit

- Promoting a culture of scientific research within the College
- Increasing the College's published scientific output
- Developing the research skills and capabilities of researchers and students
- Linking scientific research to community needs
- Promoting research ethics
- Strengthening internal and external research collaboration
- Supporting postgraduate students' research
- Promoting the use of scientific research findings in education and practice

Director of the Research Unit

Prof. Dr. Mawaheb Mahmoud Zaki

Vice Dean for Postgraduate Studies

Prof. Dr. Hanaa Abdel Gawad Abdel Meguid

Dean of the Faculty

Prof. Dr. Marwa Mostafa Ragheb
