Vision, mission and objectives of the research unit

Vision of the unit

The Research Unit at the Faculty of Nursing seeks to become a leading and distinguished center in nursing scientific research locally, regionally, and internationally.

Mission of the unit

The Research Unit is committed to supporting and developing scientific research in various fields of nursing and healthcare through providing a stimulating research environment, building researchers' capacities, and encouraging applied studies that meet the needs of society. It also seeks to enhance the quality of education and nursing practice in line with academic and ethical standards, contributing to the achievement of sustainable development.

Objectives of the unit

- ✓ Promoting the culture and importance of scientific research among faculty members and students.
- ✓ Establishing foundations and regulations for scientific research ethics within the faculty.
- ✓ Directing scientific research toward issues related to community development and service.
- ✓ Improving the quality of submitted research and publishing distinguished studies in reputable scientific journals.
- ✓ Encouraging faculty members to conduct interdisciplinary research that requires collaboration with other fields to ensure the quality of the educational and research process.
- ✓ Developing the research capabilities of researchers and students in scientific research.
- ✓ Preparing individuals to participate in scientific conferences and seminars to contribute to raising faculty awareness and community education.
- ✓ Developing networks of cooperation and communication with academic institutions and reputable research centers locally and internationally.
