The Quality Assurance Unit Vision

The Quality Assurance Unit aspires to be one of the leading units in enhancing quality standards, improving academic and administrative performance, and achieving global excellence in performance and achievement.

The Quality Assurance Unit Mission

To achieve excellence in all educational and research processes, aligning with the vision and mission of the faculty, to gain community trust in the faculty graduates by implementing a comprehensive evaluation system to review systems and processes, identify strengths and weaknesses, and prepare performance reports for development, to ensure compliance with the requirements of the National Authority for Quality Assurance and Accreditation of Education.

The General Objectives of Quality Assurance Unit

1. To foster and achieve a culture of quality among faculty members, assistants, students, and administrative staff.
2. To ensure the continuous improvement of quality in academic programs to meet labor market demands and achieve academic excellence.
3. To develop the scientific research system by supporting innovation and scientific output.
4. To enhance the training system in a specialized and continuous manner for faculty members, assistants, and administrative staff to improve their efficiency.

5. To strengthen mechanisms for the regular monitoring and evaluation of academic and administrative performance to ensure continuous improvement.
6. To develop an effective data and information management system to ensure a seamless and reliable flow of information.
7. To reinforce the faculty's role in fulfilling its social responsibilities by developing integrated programs and activities to serve the local community and meet its needs.
