

Vision, Mission, and Objectives of the Measurement and Evaluation Unit

Unit Vision:

To develop measurement, evaluation, and testing systems for students to ensure the achievement of targeted competency-based learning outcomes, in accordance with the values of fairness, transparency, and national academic standards, as a requirement for quality and accreditation.

Unit Mission:

To provide student assessment and examination systems to enhance university performance and achieve continuous development of assessment and examination systems to improve the educational quality of graduates, aligning with labor market needs.

Unit Objectives:

1. To promote a culture of quality assessment and raise awareness of the need for its development to elevate the educational process and improve the overall education system, thus contributing to ensuring its quality.
2. To prepare training programs in developing assessment tools, question banks, and automated grading.
3. To develop and train faculty members in the field of measurement and evaluation systems.
4. To prepare manuals (the Measurement and Evaluation Unit Manual and the Student Examinations Management Manual) based on standard academic criteria.
5. To implement advanced mechanisms for managing examination systems within the faculty to ensure the speed, accuracy, and transparency of examinations, thereby regulating the educational process.

6. Enhancing student feedback mechanisms regarding exams.
7. Developing and enriching exams with new content in line with curriculum development, thus contributing to the assessment of all targeted competency-based learning outcomes.
8. Ensuring the speed, accuracy, and transparency of exam administration to regulate the educational process and achieve the targeted competency-based learning outcomes.

Director of the Unit
