

## Objectives of the Pediatric Nursing Department

### General Objectives

Contribute in preparing a qualified graduate student with scientific competences, effective communication, leadership and critical thinking skills to be capable of addressing children's needs at different development stages, both during health and illness.

### Specific Objectives

**By the end of this course, the student will be able to:**

- 1- Discuss normal patterns of growth & development from neonate to adolescent.
- 2- Identify the most common pediatric health problems and risk factors affecting children.
- 3- Explain evidence-based nursing interventions and modern techniques used in pediatric care.
- 4- Apply effective communication skills with children and their families.
- 5- Perform pediatric nursing procedures safely while maintaining a safe environment and minimizing risks/hazards.
- 6- Utilize information technology in assessing and documenting pediatric nursing care.
- 7- Practice leadership skills and teamwork when providing care for children in different health settings.
- 8- Adhere to professional ethics, honesty, equity and sustainability principles when dealing with children and their families.
- 9- Respect cultural, moral and spiritual beliefs of children and their families during holistic centered care.
- 10- Participate in health education activities to solve problems related to child health and promote community well-being.
